<b>Why buy?</b>	Volume production of rigid and semi rigid materials. Need to V-groove.	Some need to cut rigid and semi rigid materials	Production cutting needs with high accuracy for semi rigid and light weight materials. Need to free up space on workbench by folding down. No cutting mat needed - integrated cutting strip included.	Regular cutting needs with high accuracy for semi rigid and lightweight materials. Cutting mat required if using Fabric head.	Portable cutting with high accuracy. Cutting mat required.	General purpose cutting of most standard semi rigid and light weight materials with less need for accuracy. Cutting mat required if using fabric blade.	Light cutting needs with little accuracy and a high need for portability. Cutting mat required.
